

# The Window Everyone Wants

THE WASH-E-Z CASEMENT WINDOW MARKS THE LATEST DEVELOPMENT IN WINDOW CONSTRUCTION ITS EASE OF WASHING, THE COMPLETE VENTILATION IT AFFORDS, TOGETHER WITH ALL ITS OTHER FEATURES, MAKE WASH-E-Z CASEMENTS THE MOST DESIRED AND NECESSARY IMPROVEMENT THAT HAS YET COME TO THE ATTENTION OF THE PRESENT HOME OWNER OR PROSPECTIVE HOME BUILDER

This view shows how easy it is to keep windows clean.

You may wash the outside of your windows as often as the inside and with no more trouble.

## *A Window Easily Washed*

The past few years have seen a constantly growing demand in new buildings for devices that do away with the drudgery and unpleasant tasks of housekeeping. Of these tasks, one of the most objectionable to the housewife has always been the washing of the outside of the windows. While many inventions have been introduced which have somewhat lessened this burden, it remained for the WASH-E-Z CASEMENT WINDOW to make window washing comparatively a pleasure. By simply swinging each sash around, the housewife is enabled to wash the outside of the windows exactly in the same manner and same position as the inside.

## *Perfect Ventilation*

In the WASH-E-Z CASEMENT WINDOW each sash can be opened outwardly from either side and adjusted at any angle. This feature enables the housewife to keep the windows open on rainy or snowy days as well as to adjust the windows to catch every breeze on sultry days regardless from what direction it comes

This shows one of the many positions in which you may adjust your window.

This position of the sash will catch a breeze and deflect it into your home.

## What You Should Know About Wash-E-Z Casement Windows

**ADAPTABILITY:** Any ordinary or standard out-swinging casement can be transferred into a WASH-E-Z CASEMENT with but few changes. As the little mill-work required is standard for all widths or heights of sashes, the WASH E-Z hinges can be installed in an old window, as well as a new one. The sash may be single or in pairs and used with or without mullions.

**EASE OF OPERATION:** It takes no more effort to open the WASH-E-Z WINDOW than required to open any ordinary hinged window. If you want the sash to open to the left, just push on the right side; if to the right, push on the left side of the sash. Clearance is left, so that swelling of the sash does not hamper the operation of the hinges in the slightest way.

**HINGES SIMPLE IN CONSTRUCTION:** There is no mystery connected with the operation or construction of the hinges used in a WASH-E-Z CASEMENT. Inspection will disclose that two complete pairs of hinges are used in the operation of each sash. These hinges are pivot hinges and differ from other pivot hinges only in their design. As the sash is opened to the left, one pair of hinges operates while the other pair is held inactive. When the sash is opened to the right, the active pair before becomes inactive and the other pair swing the sash.

**WEATHER TIGHT:** While the window can be weather-stripped, it is not necessary. Special window locks draw the sash tightly to the frame at the top and bottom and both sides, thus making it impossible for water to be blown past the sashes, during the most driving storm.

**WARPING:** The leaves of the WASH-E-Z HINGE fit tightly in grooves which are milled in the top and bottom of each sash. These metal strips extend the entire length of each sash, thus reenforcing them at the top and bottom and making it impossible for warping to occur, whether they be in an opened or closed position.

**COST LOW:** Any carpenter can install the hardware in less time than any standard casement hardware. Regular casement frames are used which are cheaper than boxed frames. WASH-E-Z CASEMENT fixtures are manufactured in several grades, in solid brass and in steel. Prices furnished upon request.

**NO AFTER COST:** WASH-E-Z HINGES once installed require no attention. The simplicity of the hinge construction and operation makes unnecessary any adjusting, repairing or care after installation.

## What Others Think of Wash-E-Z Casements

"The simplicity of operation and construction, and the non-rusting features of your hardware, makes the WASH-E-Z CASEMENT Window a very desirable window for up-to-date buildings where ease of washing and proper ventilation are desired.

C. A. LONDELIUS & SONS  
BUILDER'S HARDWARE
